SPECIAL FLOODPLAIN PROVISIONS

1. For RESIDENTIAL structures, the lowest floor (including basement) must be elevated at or above the base flood elevation (100-year flood elevation) as defined in the county, city, or town floodplain management regulations and ordinances. See provisions for manufactured homes in local regulations.
2. For NON-RESIDENTIAL structures, the lowest floor must be elevated at or above the base flood elevation, or flood-proofed to withstand the flood depths, pressures, velocities, impact and uplift forces associated with the 100-year flood as delineated in the county, city, or town floodplain management regulations and ordinances.
3. For ALL STRUCTURES, the foundation and materials used must be constructed to withstand the pressure, velocities, impact, and uplifting forces associated with the 100-year flood.
4. ALL utility supply lines, outlet, switches and equipment must be installed and elevated to minimize damage from potential flooding. Water and sewer connections must have automatic back-flow devices installed.
5. SUBMIT certification on the attached form(s) from a REGISTERED ENGINEER, ARCHITECT, or LAND SURVEYOR attesting the floor elevation and/or flood-proofing requirements have been met. Failure to provide the required certification is a violation of this permit.
